VACUUM FURNACE DIFFUSION BONDING

CAPABILITIES & FEATURES

Variety of Materials

- Stainless steel
- Titanium
- Copper
- Nickel and more

Range of Bonding Thickness

- .001" to 10"

Hot Zone Size

- 12" x 12" x 12"

Accuracy

- +/- .002" with proper fixturing alignment in multi-layer assembly

Temperature

- Maximum 1315° C

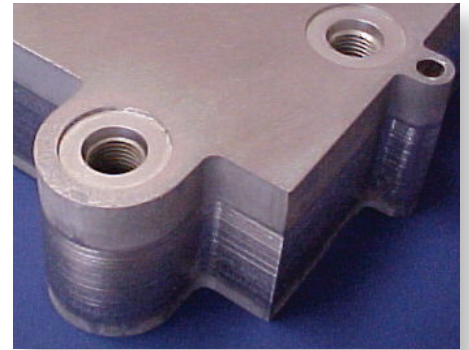

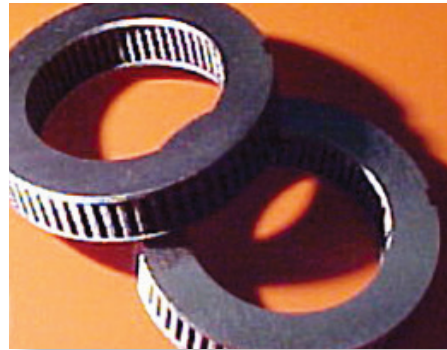

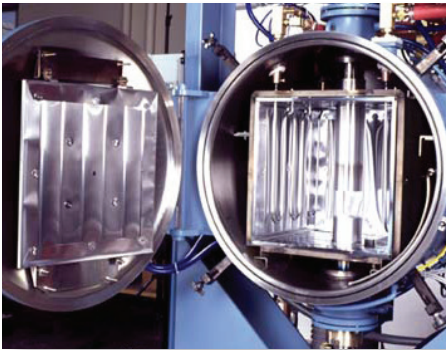

Fixtures

- Ceramic
- Molybdenum
- Stainless steel

Hermetic Sealing

Available upon request with any of the following testing methods:

- Pressure
- Bubble
- Leak
